

GOLDEN BEEF INFORMATION SHEET

Golden Beef is a unique premium beef product produced by your neighbors here in Northern Ontario. Golden Beef is raised naturally without the use of growth promoting hormones or antibiotics. Golden Beef fits into the local food trend since it is produced by farmers in North-Eastern Ontario. Golden Beef is raised solely on forages such as pasture, hay and silage. Since no grain is fed to Golden Beef animals, there is no impact on the use of grain for human food or for the new biofuel industry. Golden Beef is from younger animals to ensure tenderness and consistency.

Golden Beef is currently available in freezer packs of 30 or 40 pounds per pack. See the descriptions below for the details on each Golden Beef Freezer Pack and **our Summer offer.**
